ZofzPCB uses Open Cascade Technology library, on the base of GNU Lesser General Public License version 2.1 and the Open Cascade Exception.

LGPL gives you certain rights, mainly to supply your own version of the library instead of the one ZofzPCB is shipped with (with the bugs fixed, for instance). The License requirements are realized by using shared library (DLL) and including the library headers in closed sources of ZofzPCB, as the exception allows.
